Each food industry row should only have lbs. donated from one donor. This example is wrong because there are lbs. from two donors in one row.

All food industry rows should have the donor's name typed into the comment box. These examples are wrong because the comment box is empty.

Lbs. received from Fresh Alliance stores should not be reported on your monthly stat blocks. These examples are wrong because Safeway and Roth's are Fresh Alliance stores.

Cost of purchases should only be entered when lbs. are unknown. This example is wrong because they entered both lbs. purchased and the cost.
